RESPONSIBILITY

PROJECTS

God's Eye : Suspect Identification using Advanced Computer Vision

Jul 2018 - Jul 2018

<https://github.com/SudhanshuMishra8826/Suspect-Identification-using-Face-Recognition>

The software can detect and match faces of suspects from any live stream which can be a video on your local storage or be it the live stream from your security camera.

On successful detection an alarm message is generated.

Style transfer on Images and Live videos

Jul 2018 - Jul 2018

<https://github.com/SudhanshuMishra8826/Style-Transfer-Desktop-App>

This project is used to generate new images with a style perception of any other image, historically various researcher have worked on this topic and i have utilized those concepts to develop this application.

Blogger : Bloging Website

Jun 2018 - Present

<https://github.com/SudhanshuMishra8826/Blogger>

This is a platform for publishing blogs and sharing it with others.

It serves 3 type of users registered users, visitors, admin.

Features : CRUD on blogs, user profiles, email and sms notifications etc.

Website is live, link available on github.
